ABOUT EUROPA METALS

Europa Metals Limited is a mineral exploration company with a portfolio of antimony, gold and tungsten projects in Austria. Its initial exploration focus is the Kreuzeck West, Kreuzeck East and Goldeck-Siflitz projects, which contain documented historic workings and mineral occurrences. Europa plans to combine historical records with modern geophysics, field verification and drilling to test priority targets. The portfolio also includes Schellgaden, a historically documented gold and tungsten district that provides additional exploration exposure. The timing and scope of work at each project remain subject to approvals, access, funding and the Company's ongoing technical assessment.
